

Practice Name		Note: This sheet is not for entering data on your computer, it is only for printing and completing by hand. Once you have done this, enter your data on the appropriate data collection form.																	
Review Date- please type date beside each individual record for current month	Patient	Ethnicity Please choose from one of the following options: Ethnic Group code 1-European 2-Maori 3-Pacific Peoples 4-Asians 5-Middle Eastern/Latin American/African 6-Other Ethnicity 9-Residual Categories	Has the patient had their renal function measured (creatinine and eGFR) in the appropriate time frame according to guidelines based on their previous last eGFR and ACR readings?		Has the patient had their urine ACR measure in the appropriate time frame according to guidelines based on their previous last eGFR and ACR readings?		Has the patient had their last BP checked in the appropriate time frame according to guidelines based on their previous last eGFR and ACR readings?		Is their most recent clinic BP less than 140/90? (<150/90 if <75 yrs)			If the patient's ACR >30 and they have hypertensive disease OR if their ACR >70 even without hypertensive disease, is the patient on an ACEI/ARB?			The patient has NOT been prescribed an NSAID within the past year?		Is it recorded that the patient has received written information about their renal disease in the last year? (including how to take appropriate action if they become unwell)		Comments

	10		Y	N	Y	N	Y	N	Y	N	N/A	Y	N	N/A	Y	N	Y	N	

The timeframe based on CKD monitoring guidelines for measures 1-3 would be

- In the last 2 years if previous eGFR 45-59 with ACR < 2.5/3.5 (men/women)

- In the last 7 months if
 - Previous eGFR 45-59 with ACR 2.5/3.5 – 29 (men/women)

 - Previous eGFR 30-44 with ACR < 2.5/3.5 (men/women)

- In the last 4 months if previous eGFR 30-59 but ACR 29-70

NB the current eGFR is the first one that is <60 (CKD diagnosed if 2 readings 3 months apart <60) then the patient should NOT be included in the audit.
